## OBJECTIVE

To secure a position as a React JS developer where I can utilize my strong skills in building responsive and scalable web applications. I aim to contribute to a dynamic team and continuously enhance my expertise in front-end development.

## EXPERIENCE

01/07/2022  
-  
02/07/2023

- **Software Engineer**  
Suntech Global info solutions pvt ltd  
As a React JS developer, I leveraged my expertise in building dynamic and intuitive user interfaces. I collaborated closely with cross-functional teams to develop and enhance web applications using React JS, HTML, CSS, and JavaScript. I also contributed to code reviews, implemented performance optimizations, and ensured seamless user experiences.

## EDUCATION

2022

- **Bachelor's of Technology**  
IIMT COLLEGE OF ENGINEERING

2017

- **Inter**  
St.Columbus School  
71.4

## SKILLS

REACT JS , HTML5, CSS,  
JAVASCRIPT, NODE JS, FIREBASE  
, RESTFUL APIs

80%

Proficient in building SPAs and  
UIs with React.js. Strong grasp of  
components, hooks, and React  
Router. Skilled in optimizing  
performance using code splitting.

80%

Expertise in state management  
with Redux. Proficient in creating  
reducers, actions, and  
middleware. Familiarity with  
asynchronous actions and  
selectors.

80%

Experienced in consuming and  
managing APIs. Solid  
understanding of HTTP, status.

80%

## PROJECTS

- **Suntech Global Digital Realisation**

Developed a dynamic and responsive website for Suntech Global Info Solutions Pvt Ltd using HTML, CSS, JavaScript, React.js, Node.js, and Redux. The website showcases the company's services, projects, and team members. Implemented features like contact forms and interactive elements to enhance user engagement. Collaborated with the team to ensure seamless integration and deployment.

- **Web based Integrated Health Care Management:**

Web based integrated health care management is a project I developed using HTML, CSS, and JavaScript. It's an interface that allows for efficient management of healthcare processes, such as patient records, appointments, form validation and billing. It showcases my proficiency in front-end web development and my understanding of healthcare system. For storing the data I have used firebase real-time database so that the data would be stored directly to the firebase data collection.

- **My Portfolio website**

Designed and developed a professional portfolio website using HTML, CSS, JavaScript, React.js, and Node.js. The website showcases my skills, projects, and achievements, providing a visually appealing and user-friendly interface. Implemented responsive design principles to ensure optimal viewing experience across different devices. Leveraged React.js and Node.js to create dynamic and interactive features. Demonstrated proficiency in front-end and back-end development, as well as strong problem-solving and collaboration skills.
